

Beka Razmadze

RISK DATA ANALYST

```
SELECT precision, clarity FROM risk_analysis WHERE  
base = 'Tbilisi';
```

Dedicated Risk Data Analyst with strong expertise in financial risk assessment, data visualization, and system optimization. Proven track record of identifying operational inefficiencies and implementing data-driven solutions. Proficient in analyzing complex datasets to support strategic decision-making. Committed to leveraging analytical skills and technical knowledge to drive business growth and mitigate organizational risks.

WORK EXPERIENCE

Space International (TBC Explorers) – Innovative fintech behind TBC Bank Uzbekistan

Risk Data Analyst

JANUARY 2024 – FEBRUARY 2025

- ▶ Optimized complex SQL queries and improved report performance across large-scale risk datasets
- ▶ Conducted ad-hoc data analyses and A/B tests to support strategic decision-making
- ▶ Designed and automated daily SSRS reports, ensuring timely and accurate delivery of key risk metrics
- ▶ Developed advanced Power BI dashboards using DAX for dynamic, interactive visualizations
- ▶ Collaborated with cross-functional teams to enhance data quality and streamline reporting processes

Girteka (GBC Georgia)

Internship, SAP ABAP Developer

AUGUST 2023 – DECEMBER 2024

EDUCATION

SEPTEMBER 2024 – JUNE 2026

MS INFORMATION TECHNOLOGY

Ivane Javakhishvili Tbilisi State University

Focus Areas:

- Data Analysis & Big Data Processing
- System Analysis & Design
- Business Intelligence & Analytics

SEPTEMBER 2020 – JULY 2024

BS ECONOMICS

Ivane Javakhishvili Tbilisi State University

GPA: 3.8 | Specialization: Econometrics & Data Analysis

View Diploma

- Developed an SAP Fiori application that enabled customers to access the company's services with a single sign-on

Persati Logistics

Financialist

FEBRUARY 2022 – JULY 2023

- Developed and maintained accurate financial records and documents
- Managed accounts receivable and accounts payable to ensure accurate and timely payment of invoices
- Developed internal financial controls to reduce the risk of fraud and errors
- Prepared and presented financial reports to management and stakeholders, providing insights into performance trends and opportunities

Team Collaboration

PROJECTS

REPORTING & ANALYTICS DELIVERED

- **Auto Collection Share Pipeline** — attributes every loan repayment to its collection channel (direct payment, auto-debit, litigation, etc.) across a SQL Server → StarRocks pipeline feeding a live Power BI dashboard and Slack bots.
- **Portfolio Risk Report** — diagnosed and rebuilt a live reporting pipeline after a data-accuracy incident, restoring trust in a bank-wide risk portfolio dashboard.
- **Collection Vintage Report** — cohort-based loan recovery analysis across multiple loan products, tracking collection efficiency over time.
- **Collections Bonus Calculation** — audited and documented the multi-layer SQL → Power BI pipeline that computes monthly agent bonus payouts, uncovering real calculation bugs.

- **External Agency Recovery Reporting** — built the registry and recurring reporting pipeline tracking loans handed to third-party debt-collection agencies.

Control Center

INTERNAL WEB TOOL

A control-plane web app I built to schedule and monitor collections reporting infrastructure: gates Power BI dashboard refreshes behind live SQL health checks so nothing refreshes on stale data, runs scheduled jobs that rebuild heavy reporting tables from refill scripts, and posts real-time status to a Slack dashboard with automatic issue tracking when a job fails repeatedly.
